

What is claimed is:

1. An audio accessory including
 - a neck strap having an attachment device for attaching an audio source to the neck strap, whereby the audio source may be carried in said neck strap during normal use;
 - at least one earplug to be connected to said audio source through a set of wires to be connected to said audio source; and
 - gripping means for temporary attaching a free end of said earplug wires to said neck strap.
2. An audio accessory according to claim 1, wherein said accessory includes catching means connected to said neck strap for catching the free end of the earpiece wire carrying said least one earplug when removed from the ear.
3. An audio accessory according to claim 2, wherein said catching means includes at least one permanent magnet mounted on said neck strap.
4. An audio accessory according to claim 3, wherein said at least one magnet mounted on said neck strap is mounted at a distance from the gripping means corresponding to a free end of the earpiece wire from the gripping means.
5. An audio accessory according to claim 1, wherein the neck strap comprises gripping means for each of two earplug wires to said neck strap, and catching means connected to said neck strap for catching each free end of the earpiece wire carrying respective earplugs.
6. An audio accessory substantially as hereinbefore described with reference to the accompanying drawings.
